SOUTH GEORGIAN BAY
ONTARIO HEALTH TEAM

BRINGING MORE FOCUS TO YOUR CARE WITH AI SCRIBE

Supporting your healthcare team so they can spend more time focused on you.

What is the AI Scribe?

Our office is now using a new tool called the AutoScribe, powered by Mutuo, to help document your visits more easily and accurately. **This AI technology listens to your conversation with your physician, securely captures the important details, and, after being reviewed by your physician, adds them to your medical record.**

How Does It Help You?

- **More Face-to-Face Time**: By handling note-taking in the background, the AI Scribe allows your provider to focus on you, rather than a computer screen.
- **Better Documentation for Better Care**: This technology ensures that your medical record is accurate, complete, and up-to-date, supporting a clear picture of your health for every visit.
- **Saving Time on Paperwork:** By automatically updating your record (once reviewed by your provider), this tool frees up time for your provider to spend directly with you, creating a smoother, more personal experience.

Is My Information Secure?

We take your privacy seriously. The AI Scribe is designed with strict privacy and security measures to protect your information, complying with Ontario's health information laws. Only your healthcare team will have access to your medical information.

Questions? We are here to help!

If you have any questions about the AI Scribe or how it works, please ask a member of our team, or contact the Privacy Coordinator at privacy@gbfht.ca. We're committed to providing you with safe, attentive, and high-quality care.
